

FITLABTEAM

MONITOR YOUR TEAM IN REAL TIME

FITLAB TEAM IS THE MONITORING TOOL THAT ALLOWS
YOU TO TEST THE HRV STATE OF YOUR ATHLETES AND
MEASURE THE CARDIAC WORKLOAD IN REAL TIME
DURING YOUR TRAINING SESSIONS

MONITOR THE **CARDIAC** PERFORMANCE OF YOUR ATHLETES

Assess your team readiness and stress levels by means of HRV tests at rest and monitor training sessions to obtain stats in real time.

HRV test at rest

Training sessions in real time

SEND DATA IN REAL TIME

Monitor your team thanks to the Bluetooth LE protocol. HR sensors are attached to each user. The data sent by them are gathered and showed in real time, along with individual and global statistics.

RECORD HRV TEST AT REST

Make HRV tests at rest to know:

- ✓ HR at rest
- ✓ HRV parameters
- ✓ Stress Indexes

MONITOR YOUR TRAINING SESSIONS TEAM IN **REAL TIME**

Monitor your training sessions in real time:

- ✓ Internal workload (global and individual)
- ✓ % HR max
- ✓ Instant HR
- ✓ Average % HR max and average HR
- ✓ Record events during the session

ASSESS THE STATUS OF YOUR ATHLETES WITH PERSONALIZED QUESTIONNAIRES

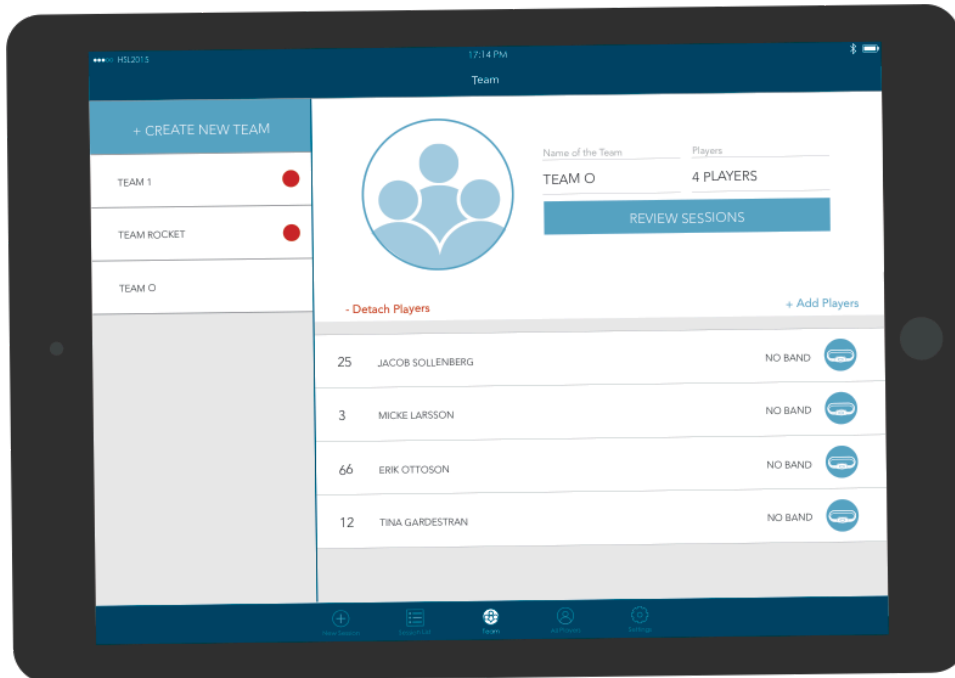

Assess the psychological and behavioral aspects of your athletes with specific questionnaires:

- ✓ Mood state
- ✓ Recovery and effort perceptions
- ✓ Stress levels

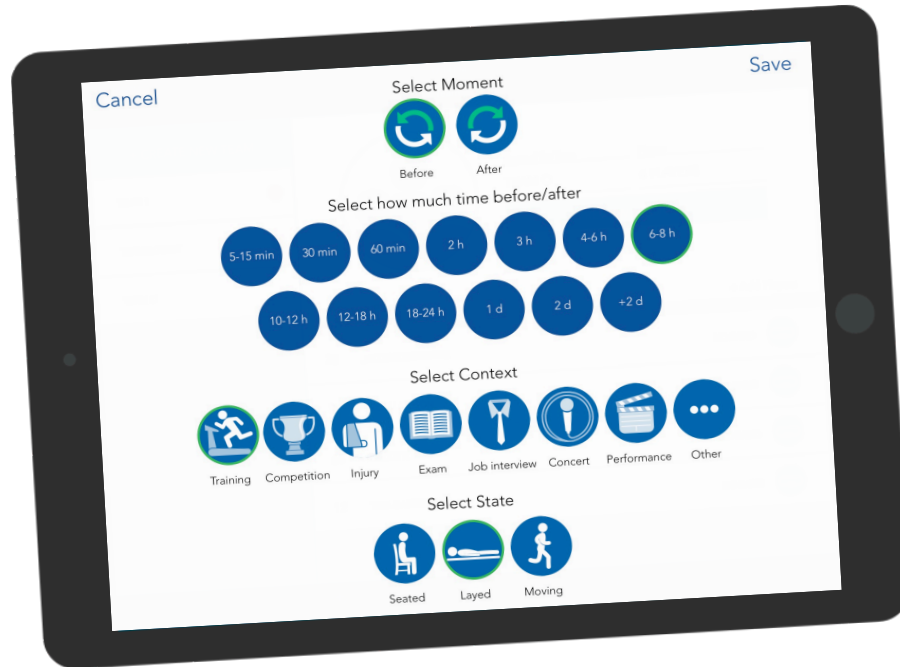

...moreover, you can ask for customized questionnaires to evaluate whatever you need!

CREATE YOUR **TEAMS** AND ADD YOUR **PLAYERS**

- ✓ Create as many teams as you need to group your different athletes

CONFIGURE YOUR TRAINING SESSIONS

Configure your settings to specify the actual conditions of the training sessions:

- ✓ Select the moment with respect to the session
- ✓ Specify time intervals
- ✓ Choose the context
- ✓ Select the position of the athletes during the tests

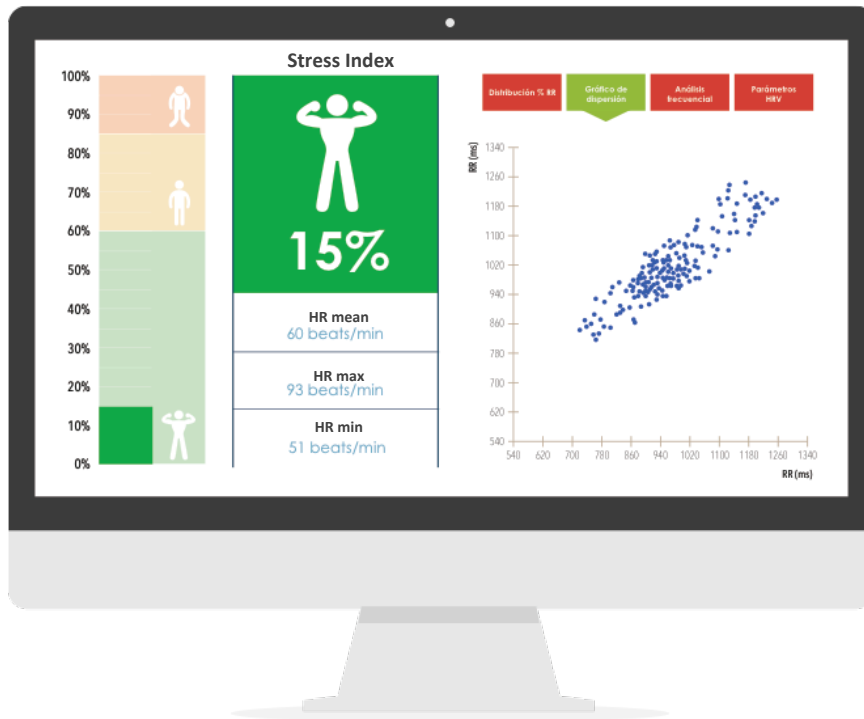

OBTAIN **INSTANT REPORTS** OF YOUR TRAINING SESSIONS

Obtain instant reports of your players:

- ✓ Individual heart rate graphics
- ✓ Stats for training events
- ✓ Other parameters: % HR max, TRIMP, etc.

OBTAIN DETAILED ANALYSIS ON YOUR **WEB AREA**

All the results obtained from the monitored sessions can be sent to your supervisor web area in order to get expert analyses and further management tools:

- ✓ HRV plots and parameters
- ✓ Historical charts
- ✓ Comparative indexes
- ✓ Export your training sessions
- ✓ In addition, you can monitor your athletes

WEB ANALYSIS FOR SUPERVISORS

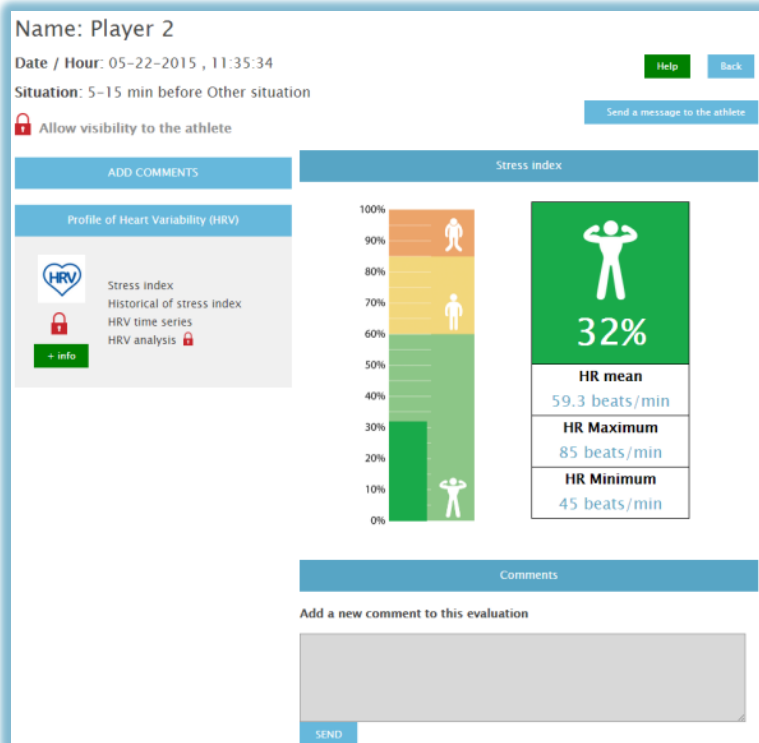

SUPERVISE YOUR ATHLETES

As a coach/supervisor, you are able to:

- ✓ Supervise the state of your athletes
- ✓ Exchange messages with the athletes
- ✓ Visualize results individually and collectively to see the evolution of a particular athlete or the assessments of your group
- ✓ Get useful data from heart rate during training sessions as well as at-rest circumstances, measure the weight evolution and answers to questionnaires of your athletes
- ✓ Multiple type of charts and tables to display information
- ✓ Export data to different formats (Excel, etc.)
- ✓ Get periodic reports of your assessments via email

HRV ANALYSIS AT REST

The HRV analysis (5 or 10 minutes) at rest provides you with the Stress Index of your athletes

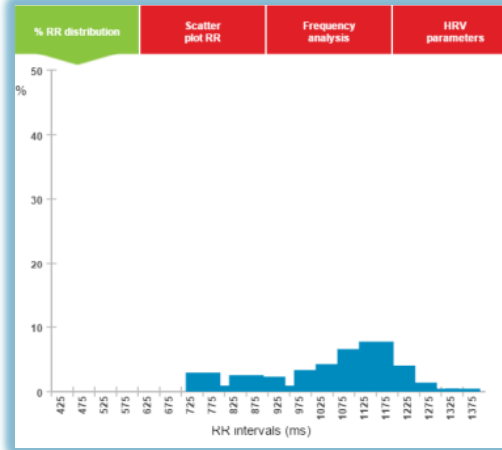

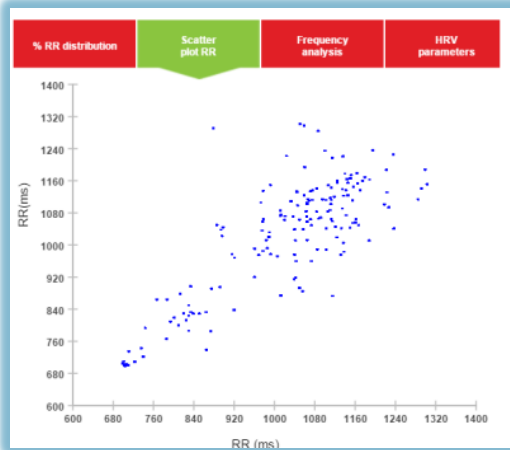

HRV ANALYSIS AT REST

- ✓ Examine the RR and HR time series of your assessments and compare them with each other

HRV ANALYSIS AT REST

- ✓ Analysis of all heart beats
- ✓ Histograms and Poincaré charts
- ✓ Temporal domain parameters
- ✓ Frequency domain parameters

HR mean	RR mean	VLF Pow.	LF/HF
58.5	1025.61	22000.34	1.73
